this edition of Rudy Rucker Sr.'s book on infinity lent an extra element of seriousness by its being newly included in Princeton 'Science Library' series.

in its new preface it refers to a possible world in which resides a man named Rudy. This man is meant to be avoiding the potential error newly being committed by Rudy Sr. himself in the actual world.

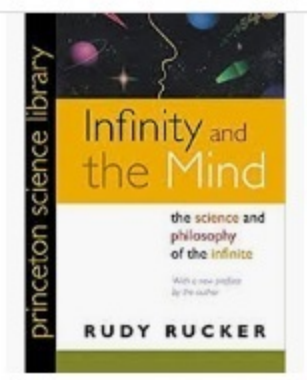

It is not easy for an ordinary mortal to see where Truth resides in this picture, Truth in the sense of Aristotle's famous phrase about safeguarding this: ἐπισωτερία γε τῆς ἀληθείας
